Art Unit: 1623

Claim 8 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The term "infection" encompasses bacterial infections, viral infections, parasitic infections etc. Since the antibiotics encompassed by the instant clams are not known in the treatment of viral and parasitic infections, there is a good reason to doubt that the claimed method is effective in the treatment of all types of infections.

Claim 3, 4, 6 and 7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The terminology "one of" (claims 3-4) is an improper Markush terminology. Such terminology as "selected from the group consisting of" can be used to overcome the rejection.

It is not clear what is meant or encompassed by the terminology "through the effect of water or an aqueous environment on the tablets and/or molded bodies" (claims 6-7). Is tablet or molded bodies dissolved in water?

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

⁽b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Application/Control Number: 10/600,556

Art Unit: 1623

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-10 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Baeyens et al ((J. of Controlled Release, 1998, Vol. 52, pages 215-220), Renard et al (J. Fr. Ophtalmol., 1996, Vol. 19, No. 11, pages 689-695) or Golub et al (U.S. Patent No. 5,459,135).

Baeyens et al disclose a soluble insert containing gentamicin sulfate and dexamethasone phosphate useful for the treatment of infections.

Renard et al disclose a composition containing indomethacin/gectamicin and a composition containing dexamethasone/neomycin.

Golub et al disclose a composition containing tetracycline and indomethacin.

Application/Control Number: 10/600,556 Page 4

Art Unit: 1623

The claimed compositions and methods are anticipated by Baeyens et al, Renard et al or Golub et al. In addition, if thee are any differences between the claimed compositions and the prior art compositions, the differences would appear to be minor in nature and the claimed compositions, which fall within the scope of the prior art compositions, would have been prima facie obvious from the said references' disclosures to a person having ordinary skill in the art at the time the instant invention was made.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elli Peselev whose telephone number is (571) 272-0659. The examiner can normally be reached on 8.00-4.30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Wilson can be reached on (571) 272-0661. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
